

Arjun Chauhan

8+ Years of experienced, specializing Requirement Management, Business Documentation, Software Testing, Project Implementation and Customer Training & Support. Hands on of Server monitoring, Data Analysis, SQL, IIS, Release management & Deployment. Strong background in MES, WMS, SCM, System-Integration, QA, Project Implementation, Techno-Functional Consultancy and Post implementation Support.

Work Experience

Organization:

Addverb Technology Limited (06/2024 – Present)
Team Lead (Software Implementation)

Motherson Technology Services Limited (05/2022 – 06/2024)
Senior Engineer

Samvardhana Motherson Peguform (06/2021 - 05/2022)
MES Engineer

MothersonSumi Infotech & Designs Limited (06/2017 - 06/2021)
Junior Engineer > > Engineer

Projects:

Project 1: End to End / Gate to Gate Traceability Solution

Environment: .Net, SQL Server, Web Applications, PLC Integration

Location: Chennai, India

The system was developed to provide; Forward and Reverse Traceability for the client who produce Brakes of Vehicles. This system allows to get the report of raw materials consumed to produce an FG.

The system was integrated with SAP. This system pulls master data like GE, BOM, Production version, Invoices etc. from SAP using web services to further use by system. This system allows to print labels of Skid, Box, and Packets etc.

Project 2: iDACS IOT Platform and Factory Simulation

Environment: Angular, SQL Server, Web and Android applications

Location: Manesar (Haryana), India

The Project is introduced as a product that can be delivered to any industry to monitor Real time data with the Reports and Dashboards.

For this we have integrated PLCs with SQL Database server using Kepware and then process the data to calculate the OEE, TEEP, Resource efficiency etc. Real time Data visualization is introduced with different views.

Soft Skills

- ❖ Quick learner
- ❖ Team Player
- ❖ Positive Attitude
- ❖ Leadership Quality
- ❖ Self-Motivated
- ❖ Problem Solving
- ❖ Adaptability
- ❖ Analytical & Critical Thinking
- ❖ Proficient in Communication Skills
- ❖ Proficient in Presentation Skills

Technical Skills

- ❖ Requirement Management
- ❖ Agile Methodology
- ❖ Data analysis
- ❖ Debugging & coding of SQL
- ❖ DOS commands
- ❖ Kepware Integration with PLC
- ❖ IIS - Site hosting & Configurations
- ❖ Release Management & Deployment
- ❖ API/ Web/ Android Application Testing
- ❖ Blackbox / Whitebox Testing
- ❖ System Integration Testing
- ❖ Functional Testing
- ❖ Project/Product Implementation
- ❖ Artifacts & version management
- ❖ Experience in End-to-End SDLC
- ❖ Power BI reports and Charts
- ❖ Technical Workflows & Documentation

Languages

- ❖ English | Proficient | Read-Write-Speak
- ❖ Hindi | Native | Read-Write-Speak

In this project, we simulate various machines in a factory layout, so we get a good idea of the overall functioning and working of a factory process. For this we have designed SQL Database server for MES flow in which machines and other master data has been established. UI was developed in Angular. This system was used to design Plant Layout and then to simulate Discrete and Batch manufacturing with provided control buttons.

Project 4: iDACS (MES-SAP-Machine Integration)

Environment: Angular, SQL Server, Web and Android applications with machines and ERP integration

Location: Cuprija, Serbia

In this project, iDACS system is implementing in a Greenfield Manufacturing plant. In this plant Injection Molding, Foaming, Leather Cutting, etc. processes are involved, and software is designed and implemented in a way to track the production steps. To monitor the production volume and provide the Q-gate.

ERP-iDACS-Machine are integrated to execute the flow of MES Cycle. This system is designed to provide the facility of Logistics movement too. Produced parts could be tracked on the shopfloor so that proper inventory management is possible.

Project 5: Industry 4.0 Traceability and User Guidance System integrated with Oracle ERP

Environment: Angular, SQL Server, Xamarin, Microcontrollers

Location: Noida

In this project, Industry 4.0 product is implementing to fulfil supply chain management cycle for customer to provide traceability for the finished product. It is implemented in manufacturing plant where wiring harness is getting produced. This system was directly integrated with Oracle ERP to pull all the required master data and to post the transactions back to Oracle.

Project 6: Traceability solution for RM Warehouse (WMS Solution)

Environment: Angular, SQL Server, Web and Android applications, Oracle Integration

Location: Noida

In this project, a digitalized solution was provided to customer to provide traceability of Raw material input /output to / from stores. This system was integrated with Oracle ERP suite. The objective of this solution was to provide end-to-end traceability and to monitor consumption and availability of critical raw materials in warehouses.

Project 7: B2B and B2C Warehouse Automation

Environment: Angular, SQL Server, Web applications, SAP – MES & WMS Integration

Location: Multiple Sites

Automated multiple large-scale warehouses and distribution centers to improve speed, accuracy, and efficiency using Core products of company which includes but not limited to ASRS for Storage & Retrieval, GTP, PTL, Conveyor and material handling solutions which are integrated with in-house WMS solution. It can further integrate with SAP, MES and third-party hardware and Robots also.

Tools

- ❖ MS Excel, Word, PowerPoint
- ❖ MS Visio, Power BI
- ❖ MS Power Automate
- ❖ MS SQL Server, SSMS, DBeaver
- ❖ Visual Studio, VS Code
- ❖ Keware, Postman
- ❖ IIS, Kubernetes
- ❖ Azure Devops, JIRA
- ❖ Team Foundation Server (TFS)
- ❖ MS Teams, Lync, Skype, Zoom, Meet
- ❖ e-Support Helpdesk
- ❖ VNC, TeamViewer, AnyDesk
- ❖ HyperTerminal, RabbitMQ
- ❖ Smart Manufacturing & MES suite
- ❖ Warehouse Automation Robots

Industrial Experience

- ❖ Strong Practical experience of Discrete manufacturing industry.
- ❖ Onsite experience of Overseas projects.
- ❖ Handon experience of handling installation, implementation, and management of hardware on customer sites.
- ❖ Exceptional experience of project implementation in large scale OEMs sites.
- ❖ Experience and thorough knowledge of physical manufacturing processes such as Injection Molding, Foaming, Cutting, Heat Treatment, Pressing, Assembly processes etc.
- ❖ Independently Handled Project Implementation in Greenfield plant.
- ❖ Worked on projects lies under Industry 4.0.
- ❖ Exceptional Functional Knowledge of Industrial level MES and WMS solutions
- ❖ WMS Solutioning for B2B, B2C and Retails
- ❖ PTL and conveyor automation solutions

Achievements

- ❖ Awarded as Rising Star
- ❖ Awarded as Start Performer
- ❖ Published e-learning course for Manufacturing and ERP fundamentals.
- ❖ Awarded as “Guru” for imparting internal training in organization.
- ❖ Member of CEO Club 2021
- ❖ Member of Vice Chairmen Club 2022

Responsibilities

- Collaborating with new or existing customers to gather business requirements and identify technical solutions.
 - Analyzing existing projects and solutions and identifying opportunities for customization for fulfilling customer requirements.
 - Managing artifacts and tasks such as Business Requirements, Functional Specifications, Data Mappings, and User Stories etc.
 - Providing product analysis, design functionality & feature support and collaborating with cross-functional teams to transform business problems into technical solutions during development.
 - Facilitating technical discussions and whiteboarding for project integrations, architecture, workflows, and technical solutions from one-to-many technical applications.
 - Performs Review and participates in any customer design phase of a delivery project to ensure the requirements are captured in an effective and consistent manner.
 - Expertise in SQL and RDBMS to perform data modeling and analysis for reporting purpose.
 - Adopting Agile methodologies to ensure efficient project delivery and management of software development lifecycle.
 - Using tools like MS Visio and MS Office to visually represent and communicate complex workflows and processes.
 - Creating and managing client-facing documentation and technical documentation like SRS, CR, User Manuals, SOPs, System Specifications, Efforts Estimation, Proposals, Project Scope, SOW etc.
 - Analyzing existing projects and solutions and identify opportunities for improvement.
 - Working closely with Development and Delivery team to ensure solutions are aligned with technical architecture and standards.
 - Managing project delivery timeline and Communication with customers to ensure solutions are delivered on-time.
 - Resolving Bugs and improvement in system using database programming in SQL.
 - Using tools such as Jira & Devops to log Bugs and Defects reported during internal testing and / or raised by customer.
 - Conducting UATs, prototyping, POCs for new customers to ensure solutions meet business requirements.
 - Managing testing activities by test case preparation, testing execution, environment setup, software installations etc.
 - Conducting Functional Testing (Unit, System, and Integration Testing) and Non-Functional Testing.
 - Handling project implementation for Domestic and International customer sites by visits and remotely.
 - Provide training and support to end-users for product use and support on technical side.
 - Managing release deployments and updates of installed projects.
-

Certifications

- ❖ Certified Tester Foundation Level (CTFL) ISTQB - [Udemy.Com](https://www.udemy.com/)
- ❖ Scrum Foundation Professional Certificate
- ❖ Google Analytics for Beginners
- ❖ Business Intelligence Foundation Professional Certificate
- ❖ Introduction to IoT
- ❖ Project Management Foundation
- ❖ English Speaking Course
- ❖ RabbitMQ Certification

Volunteer Experience

- ❖ Connected with an NGO for Student Mentorship Program.
- ❖ Published own Courses of Company products for Knowledge sharing on organization level.
- ❖ Imparted training on MES subject on organization level.

Education

- ❖ PGDM – Operations Management | 2026
IMT, Ghaziabad, India
- ❖ Bachelor of Computer Applications | 2022
IGNOU, Delhi, India
- ❖ Polytechnic Diploma in E.C.E. | 2017
Pusa Institute of Technology, Delhi, India
